

The Population Census has begun.

As of October 1, the population census is being conducted.

The Population Census covers everyone living in Japan regardless of nationality. You are required by law to respond.

Starting at the beginning of September, Population Census workers will visit all households to distribute census forms.

Please seal your completed form in an envelope and hand it to your census worker. Alternatively, you can submit your form by mailing it to your municipal government.

The data collected from the population census will be used as a baseline for city planning and other measures which benefit foreign residents as well as Japanese citizens.
